June 2016

NEWS

- Firstly my apologies to Steve Weaver for not accrediting the item on the passing of Mercury to him, but I thought that happened in November 1991 after Freddie filmed “ These are the days of our lives”, moving swiftly on!
- Early June public running was handled by Steve Weaver and his cl 37, and Pete Garrod with his new cl 73 in Intercity livery on a running-in turn. Traffic was slow and steady, surprising considering the glorious weather, maybe the general public have forgotten what to do when the sun shines!
- Mid June public running saw us light on the ground for available members to run a service, it was just as well that the public were an even rarer breed only appearing in dribs and drabs through the day. We had a visit from two members of the Chesterfield Society involved in running the Papplewick Pumping Station track and have cordially made an offer for any of our members to visit, details of a contact number are held by myself and Alan Budd.
